

Racing Price Monitor

Now, you will know UK/Ire racing prices at every minute

This software will provide you price comparisons during the day for all UK and Ireland horses

Michael & Steve
5/7/2015

Hi,

Thanks for your interest in Racing Price Monitor.

In our betting headquarters, we continue to make all efforts to make your betting more profitable and easier.

During last few months, we continue to face this need from many clients on how they can determine the price movement of any horse throughout the day.

Why clients have requested this ask?

Because like you, they also want to know the horse(s) where all the money is getting in at that very moment, in short they want to understand the price movement at more granular level.

Today, there is no such tool in market where you can find the comparison of horse prices between two data points - say 10:00am UK and then 12:45am UK.

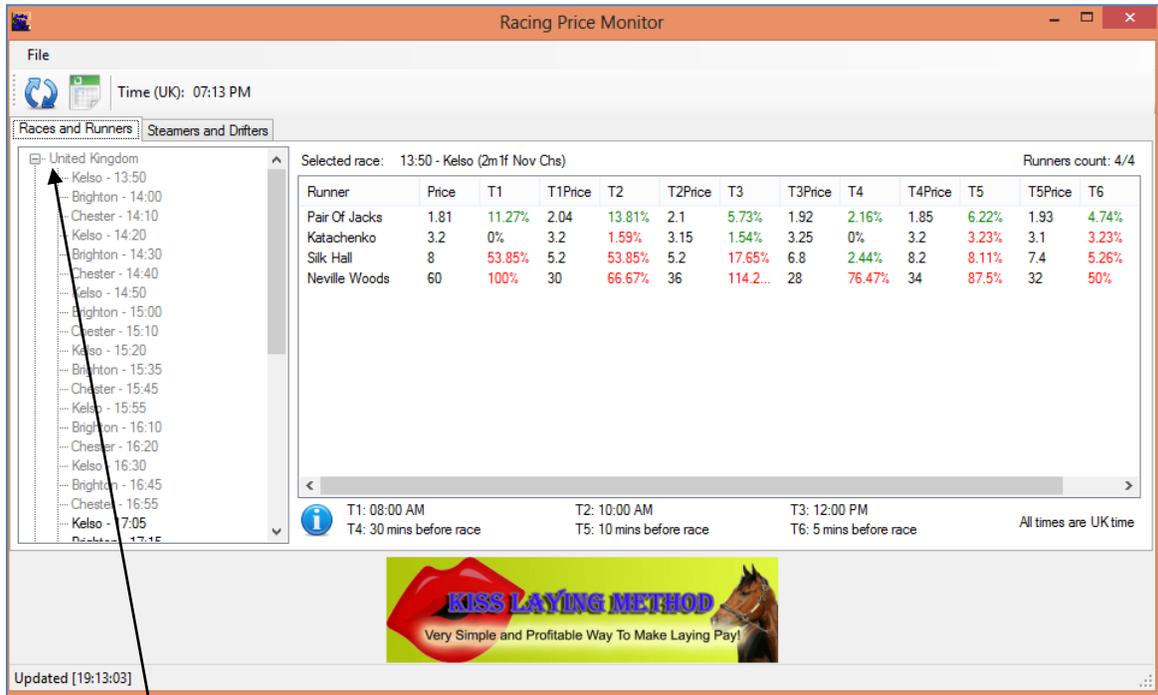

But we have changed that with our new product.

Racing Price Monitor

As the name suggests, Racing Price Monitor is monitoring all UK and Ireland race meetings right from 6:00 am UK time and till the last race for the day is over. And it does that monitoring all seven days of the week and all 12 months of the year.

Without wasting any more time, let me take you into the software interface.

Post installation of the software (after your purchase), you will see the following screen.

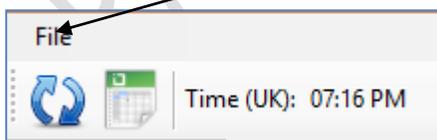

On the left hand side, you will see all the races for the day in UK and Ireland. There are primarily two tabs we have in this software **Races & Runners** and **Steamers & Drifters**.

We will discuss the Races and Runners tab first.

In this tab, you will see the price movement of all horses for all races for any data point (time) during the day.

When you click on the File button

You will get the following screen after clicking sub button for time options.

The screenshot shows a 'Set Times' dialog box with the following configuration:

- T1 options:** Exact time: 08:00:00; Minutes before start: 1
- T2 options:** Exact time: 10:00:00; Minutes before start: 1
- T3 options:** Exact time: 12:00:00; Minutes before start: 1
- T4 options:** Exact time: 00:00:00; Minutes before start: 30
- T5 options:** Exact time: 00:00:00; Minutes before start: 10
- T6 options:** Exact time: 00:00:00; Minutes before start: 5
- Steamers/Drifters Options:** Exact time: 10:00:00; Minutes before start: 1

Buttons: Save (highlighted), Cancel

In the above screen, you can see that we have six time set options which we can use in order to capture prices at these time slots. **By default**, you will have the following time set.

T1 - 8am UK

T2- 10 am UK

T3- 60 minute before the start of the race

T4 - 30 minute before the start of the race

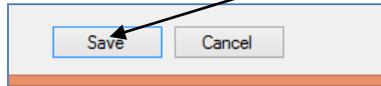

T5 - 10 minute before the start of the race

T6 - 5 minute before the start of the race

For any time set, (T), you can choose either the exact time or minute before the start.

We are not discussing T0 right now, that we will discuss once we move to Steamers and Drifters tab.

If you want to change to any time settings, please change it and then save the settings.

Let's go back to main screen.

| Runner | Price | T1 | T1Price | T2 | T2Price | T3 | T3Price | T4 | T4Price | T5 | T5Price | T6 |
|---------------|-------|--------|---------|--------|---------|----------|---------|--------|---------|-------|---------|-------|
| Pair Of Jacks | 1.81 | 11.27% | 2.04 | 13.81% | 2.1 | 5.73% | 1.92 | 2.16% | 1.85 | 6.22% | 1.93 | 4.74% |
| Katachenko | 3.2 | 0% | 3.2 | 1.59% | 3.15 | 1.54% | 3.25 | 0% | 3.2 | 3.23% | 3.1 | 3.23% |
| Silk Hall | 8 | 53.85% | 5.2 | 53.85% | 5.2 | 17.65% | 6.8 | 2.44% | 8.2 | 8.11% | 7.4 | 5.26% |
| Neville Woods | 60 | 100% | 30 | 66.67% | 36 | 114.2... | 28 | 76.47% | 34 | 87.5% | 32 | 50% |

Current time in UK is 7:44pm (as it is shown above) and We are looking at Kelso - 1:40 pm race which has already been over 6 hours back but still , we have complete view of how the prices moved for all horses for this race since 8 am UK time.

Understanding the columns and headings now:-

Selected race - it will show the course, time, type of the race.

Runner - Horse Name

Current Price - it will show the current price on offer for that horse. Once the race is over, it will show the last price available. (Please remember it is not Betfair Starting Price (BSP) but last price on Betfair before the BSP price.) you can assume it is price 1 second before the start time.

| Runner | Price |
|---------------|-------|
| Pair Of Jacks | 1.81 |
| Katachenko | 3.2 |
| Silk Hall | 8 |
| Neville Woods | 60 |

So, I can say pair of Jacks had the last price on Betfair as 1.81 before the race started.

| Selected race: 13:50 - Kelso (2m 1f Nov Cha) | | | | | | | | | | | Runners count: 4/4 | |
|--|-------|--------|---------|--------|---------|----------|---------|--------|---------|-------|--------------------|-------|
| Runner | Price | T1 | T1Price | T2 | T2Price | T3 | T3Price | T4 | T4Price | T5 | T5Price | T6 |
| Pair Of Jacks | 1.81 | 11.27% | 2.04 | 13.81% | 2.1 | 5.73% | 1.92 | 2.16% | 1.85 | 6.22% | 1.93 | 4.74% |
| Katachenko | 3.2 | 0% | 3.2 | 1.59% | 3.15 | 1.54% | 3.25 | 0% | 3.2 | 3.23% | 3.1 | 3.23% |
| Silk Hall | 8 | 53.85% | 5.2 | 53.85% | 5.2 | 17.65% | 6.8 | 2.44% | 8.2 | 8.11% | 7.4 | 5.26% |
| Neville Woods | 60 | 100% | 30 | 66.67% | 36 | 114.2... | 28 | 76.47% | 34 | 87.5% | 32 | 50% |

I have used default settings only for my screenshots. For, T1 is 8am UK time only.

For Pair of Jacks, @ 8am UK time, the price was 2.04 and the last price was 1.81 - so, it steamed in 11.27% since 8 am UK time until the race start time

By the way, Pair of Jacks was always steamed in throughout the day. Like it did steam 6.22% in last 10 minutes of the race and 4.74% in last 5 minute of the race.

Looks like a good back bet 😊

| FULL RESULT | | | | | | | | | |
|-------------|------|---------------|--------------|-----|---------------------------------------|------------------|------------------|-------|--|
| Pos (Draw) | Dist | Horse | Wgt Age (OR) | Eq | Jockey Trainer | In-play High/Low | BSP/ISP (+/-) | Place | |
| 1 - | | Pair Of Jacks | 7 10-12 | - | Brian Hughes Malcolm Jefferson | 4 / - | 1.81 / 1.8 (-4%) | 1.2 | |
| 2 - | ¾ | Katachenko | 6 10-12 | h | Wilson Renwick Donald McCain | - / 1.25 | 3.22 / 3 (5%) | 1.47 | |
| 3 - | 14 | Silk Hall | 10 10-12 | b | James Reveley J. J. Lambe, Ireland | - / 6.2 | 8.6 / 7.5 (11%) | 2.93 | |
| 4 - | 9 | Neville Woods | 8 10-12 | tcp | Mr John Dawson (5) J. L. Gledson | - / 21 | 48.6 / 34 (37%) | 7.87 | |

It did win but I am not asking to make it as a rule as this is something which needs to be watched out. Obviously, when we are betting on such steamers, we are betting against value so, we need to be over cautious in such cases.

Coming back to the software now,

Racing Price Monitor is showing only Betfair prices. No Bookies prices here.

It will always reflect the price which is best back price where the money is available to be matched. In short, it is considering the prices as highlighted in the circle below.

| <input type="checkbox"/> Betfair Starting Price (SP) | | 103.8% | | BACK | WoM | LAY | 95.8% | |
|--|------------------------------|--------------|--------------|-------------|-------|--------------|-------------|--------------|
| | Vujiyama 2 | 4.4 \$11 | 4.5 \$41 | 4.6 \$41 | +127% | 4.8 \$4 | 4.9 \$23 | 5 \$14 |
| | By The Boardwalk 8 | 4.8 \$5 | 5 \$5 | 5.1 \$15 | +19% | 5.5 \$8 | 5.6 \$7 | 5.8 \$6 |
| | Who Am I | 6.8 \$31 | 7 \$7 | 7.4 \$20 | +12% | 7.6 \$16 | 7.8 \$15 | 8.4 \$21 |
| | Nether Stream | 9.8 \$6 | 12.5 \$4 | 19 \$9 | -58% | 24 \$4 | 220 \$4 | 230 \$22 |
| | Thats Yer Man | 11 \$12 | 11.5 \$4 | 13 \$5 | -67% | 15.5 \$4 | 19.5 \$9 | 36 \$22 |
| | Thinger Licht 1 | 3.6 \$103 | 3.65 \$20 | 3.7 \$6 | +17% | 3.75 \$11 | 3.8 \$80 | 3.95 \$19 |
| | Kap West | 11 \$5 | 15 \$6 | 16.5 \$4 | -200% | 20 \$17 | 34 \$5 | 120 \$23 |
| | Stafford Charlie | 23 \$7 | 27 \$5 | 34 \$4 | | 75 \$6 | 90 \$4 | 110 \$6 |

Other good thing about the software is that you can change the T1 to T6 settings in interval of minimum 1 minute or more and you can also change the T1 to T6 once the race has been run, just to know the price at other times.

And you can all the race data for any given day till mid night UK and then it switches over to next day and all previous data is either gone or you can save the data in your excel sheet before the switch over.

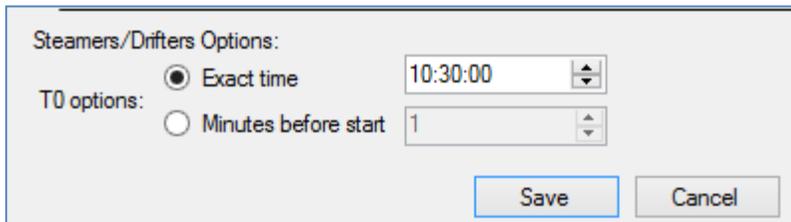

This is the excel button and it will save all required data from the screen on to your pc.

Refresh button: There is auto refresh in every 15 seconds but if you want to refresh much earlier than 15 seconds, please press refresh. I don't think you really need to use refresh button.

Let's look at what we have on another tab Steamers and Drifters.

Now, it is important to note about T0.

T0 is the time from where all the steamers and drifters will be measured as you can see below.

| Steamers | | | | Drifters | | | |
|---------------------|-------------|---------------|----------|-------------------|-------------|---------------|----------|
| Race | Price at T0 | Current Price | Movement | Race | Price at T0 | Current Price | Movement |
| Lingfield (17:10) | 8 | 4.9 | 38.75% | Lingfield (16:40) | 13 | 20 | 53.85% |
| Lingfield (16:40) | 9.2 | 6 | 34.78% | Lingfield (16:40) | 9.6 | 14.5 | 51.04% |
| Nottingham (16:45) | 4.4 | 2.94 | 33.18% | Lingfield (16:40) | 11.5 | 14 | 21.74% |
| Thirsk (18:10) | 4.3 | 2.94 | 31.63% | Lingfield (16:40) | 5.2 | 5.7 | 9.62% |
| Hexham (17:00) | 3.05 | 2.2 | 27.87% | Ascot (16:55) | 11 | 11.5 | 4.55% |
| Lingfield (16:40) | 8.8 | 6.6 | 25% | Warwick (19:25) | 2.4 | 2.48 | 3.33% |
| Hexham (17:30) | 3.05 | 2.5 | 18.03% | Lingfield (16:40) | 3.7 | 3.75 | 1.35% |
| Haydock (17:05) | 6 | 5 | 16.67% | Warwick (17:25) | 1.79 | 1.81 | 1.12% |
| Ascot (16:55) | 11 | 9.4 | 14.55% | | | | |
| Warwick (18:25) | 2.46 | 2.12 | 13.82% | | | | |
| Ascot (16:55) | 10.5 | 9.2 | 12.38% | | | | |
| Thirsk (20:10) | 2.4 | 2.16 | 10% | | | | |
| Ascot (16:55) | 10.5 | 9.6 | 8.57% | | | | |
| Nottingham (17:15) | 2.58 | 2.36 | 8.53% | | | | |
| Gowran Park (17:20) | 2.86 | 2.62 | 8.39% | | | | |

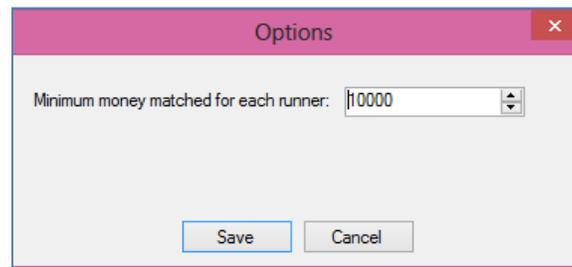

In the screenshot above, you can see all the horses for the day (both steamers and drifters) in the descending order of % movement. So, both biggest drifters and steamers will get highlighted at the top. Their % movement is being measured between the current price and price at 10:30 am UK time.

And it changes continuously with every auto refresh and the runners which have been run will get automatically deleted.

Now, as a user of this software - you may want only horses for steamers and drifters which has decent amount of money matched

So, we have an additional feature where you can decide the minimum volume matched for that horse to be either qualified in steamer or drifter category.

Please remember, we are considering this extra feature on volume matched only for steamers & drifters side.

You can enter the value here. i.e. if you enter 10,000 , it means only those horses will find their place in steamers & drifters list which has minimum of \$ (US) 10,000 matched. Yes, this takes values in \$.

Intent of this filter is to ensure we don't get poor liquidity horses in our list which will obviously impact the % movement of prices and hence impact our steamers and drifters list. I would recommend keeping it 10,000 for Australian clients and 8,000 for UK and Ireland clients (GBP) - just to ensure we filter out poor horses from the list.

The Steamers & Drifters list constantly update itself with every auto scan and you will know the best steamers and drifters for Uk and Ireland at any given point in time.

Racing Price Monitor is really available at very cheap price for the yearly subscription. This is the only software in the world which can provide you visibility to Betfair price at every minute for all UK and Ireland horses at a such low price.

Buy it NOW before we increase the price☺. We only plan to sell first 50 copies at this price so all our regular clients get this discounted copy.

You can reach out to me for any questions. Email me on Michael_racing@yahoo.com

Thanks again for your support. We will continue to deliver more innovative automated betting solutions in coming months.

Cheers

Steve & Michael
